Application/Control Number: 10/811,580

Art Unit: 2155

The active claims are 3-38.

In view of Applicants' remarks filed 6/13/2005, the 112 Rejection and the 103 Rejection over Abraham are withdrawn.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 3-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yu (USP 5,734,865).

Details of the rejection have already been set forth in the last Office action. The details are incorporated herein by reference thereto.

In the communication filed on 6/13/2005, Applicants contended (page 11, line 13) that Yu's network interface is not Applicants' application because they are in different layer. The claims are not so limited. The claims do not recite what layer or level the applications are in. The applications as recited are entities connected to a network for communication. The applications as recited are no different from the interfaces in Yu. The Bell reference (USP 5,951,650, not applied) is cited to show associating applications with IP addresses in a virtual network environment. See the abstract and lines 50-55 of column 2.

In the last two lines of page 11, Applicants contended that using IP addresses for isolation is not well known in the art. Firstly, the claims recite using different environment and not different IP addresses for isolation. See the last two lines of claim 3 for example. Claim 3 recites "—different from the first virtual network environment" and not different from the first IP addresses. Secondly, the purpose of associating

Application/Control Number: 10/811,580

Art Unit: 2155

addresses to entities is to isolate or separate the entities so that they can be identified individually. It is not understood why this is not obvious and required evidence to support. The purpose of IP addresses is no different from the street addresses.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
